

(*Dipodomys ingens*), and San Joaquin kit fox (*Vulpes macrotis mutica*); all of these, with the exception of the squirrel, are listed as endangered under the Federal Endangered Species Act. The plant species of concern are generally concentrated in a limited number of locations such as existing refuges and reserves, the southeastern portion near Wheeler Ridge, and several locations in the lower foothills in the eastern portion of the Plan area. The Plan provides long-term protection of identified species while allowing for the economic growth of the county. The Plan has seven major components: (1) Habitat zones; (2) compensation framework; (3) direct fee payment option; (4) take-avoidance measures; (5) safety nets; (6) industry/agency conservation strategies; and (7) direct negotiation option.

The Plan area is divided into three "Habitat Zones" with lands categorized based on habitat value with a corresponding conservation priority. The Red Zones are areas of highest quality habitat for species of concern, especially for Federal and State listed threatened and endangered wildlife species. A number of rare plant occurrences also are found in these zones. The Green Zones provide the second highest habitat quality and generally include areas around the western, southern, and eastern edges of the Plan. White Zones comprise about 55 percent of the total Plan area, including 121,219 acres of natural, less valuable habitat, and occur throughout the central and eastern portions of the Plan area. The habitat zones serve as the basis for the Compensation Framework.

The Compensation Framework encourages conservation of high-quality habitat and creates a system of conservation credits based on habitat quality. This component of the Plan is a pay-as-you-go mitigation approach. Compensation will be provided in specified ratios to address the actual take of species habitat. However, up-front compensation is specified for the oil and agricultural conservation strategies.

Direct Fee Payment is an option provided to project proponents involving payment of fee based on conservation credits.

Take-avoidance Measures are included in the Plan to reduce the likelihood and magnitude of direct loss of the five wildlife species noted above.

Safety Nets are part of the Rare Plant Conservation Strategy designed to protect specific plant species with localized and restricted distributions.

Industry/Agency Conservation Strategies address the potential for incidental take of species of concern

that may occur with certain activities associated with major land uses in the Plan area (e.g., oil and gas, agriculture, water conveyance systems, ranching, and urban development).

The Direct Negotiation Option allows a project proponent to address the issue of Federal and California Endangered Species Act compliance with the Service and California Department of Fish and Game, respectively, independently of other Plan provisions.

The joint Environmental Impact Statement/Report will consider the proposed action (issuance of a Section 10(a) Endangered Species Act permit for the Plan) and a reasonable range of alternatives derived from conservation and compensation approaches considered during formulation of the Plan:

Alternative 1—No Action. This alternative assumes compliance with the Federal and California Endangered Species Acts on a project-by-project basis.

Alternative 2—Initial Compensation. This alternative would establish compensation and take-avoidance formulas applicable to all permitted activities allowed in each of the three habitat zones. Development projects in each zone would be required to provide compensation, and in some cases identify and secure options to purchase suitable habitat land for which conservation credits would be received. The supplementary credits could be banked and sold to other developers needing habitat conservation credits.

Alternative 3—Protect and Release. This alternative incorporates a release ratio limit of one acre of development for every nine acres of permanently protected land in the Red Zones only. It also requires a compensation ratio unique to each of the three zones for habitat disturbance.

Alternative 4—Habitat Transaction Method. This alternative would assign a relative conservation credit value per acre within each habitat zone. A compensation ratio of not more than 3:1, based on conservation credits, would be used to determine compensatory requirements. Credits would be generated by the permanent preservation of habitat, restoration, granting of conservation easements, and other measures. The value of the credits and the amount of required compensation would be based on the conservation value of the land preserved and developed, respectively.

Environmental review of the Plan will be conducted in accordance with the requirements of National Environmental Policy Act, as amended (42 U.S.C. 4321 *et. seq.*), National Environmental Policy

Act regulations (40 CFR parts 1500–1508), other appropriate regulations, and Service procedures for compliance with those regulations. This notice is being furnished in accordance with Section 1501.7 of the National Environmental Policy Act to obtain suggestions and information from other agencies and the public on the scope of issues to be addressed in the joint Environmental Impact Statement/Report.

Comments and participation in the scoping process are solicited. The primary purpose of the scoping process is to identify rather than debate any significant issues related to the proposed action. Interested persons are encouraged to attend the public scoping meeting to identify and discuss issues and alternatives that should be addressed in the joint Environmental Impact Statement/Report. The proposed agenda for this facilitated meeting includes a summary of the proposed action; status of the threats to subject species; and tentative issues, concerns, opportunities, and alternatives. Additional public meetings will be conducted on later dates to provide more opportunities to comment on the draft Environmental Impact Statement/Report.

Dated: October 15, 1997.

Regional Director, Region 1, Portland, Oregon.

Indian Entities Recognized and Eligible to Receive Services From the United States Bureau of Indian Affairs

AGENCY: Bureau of Indian Affairs.

ACTION: Notice.

SUMMARY: Notice is hereby given of the current list of tribal entities recognized and eligible for funding and services from the Bureau of Indian Affairs by virtue of their status as Indian tribes. This notice is published pursuant to Section 104 of the Act of November 2, 1994 (Pub. L. 103-454; 108 Stat. 4791, 4792).

FOR FURTHER INFORMATION CONTACT: Daisy West, Bureau of Indian Affairs, Division of Tribal Government Services, MS-4641-MIB, 1849 C Street, NW, Washington, DC 20240. Telephone number: (202) 208-2475.

SUPPLEMENTARY INFORMATION: This notice is published in exercise of authority delegated to the Assistant

Secretary—Indian Affairs under 25 U.S.C. 2 and 9 and 209 DM 8.

Published below are lists of federally acknowledged tribes in the contiguous 48 states and in Alaska. The list is updated from the last such list published in November 13, 1996 (61 FR 58211), to include name changes or corrections. There have been no new tribal entities added to the list. The listed entities are acknowledged to have the immunities and privileges available to federally acknowledged Indian tribes by virtue of their government-to-government relationship with the United States as well as the responsibilities, powers, limitations and obligations of such tribes. We have, however, continued the practice of listing the Alaska Native entities separately solely for the purpose of facilitating identification of them and reference to them given the large number of complex Native names.
